

The four pictures on this page illustrate the versatility of **TC-417** when used to insulate ceilings of varying complexity.

Note that whether the ceiling is clean as in 1), or quite cluttered as in 4), the quality of the installation and its effectiveness in producing a monolithic installation are unimpaired.

The four illustrations are from four different jobs, and 4) is from an overseas location. These pictures clearly demonstrate that the product can be installed consistently and effectively by trained applicators anywhere in the world.
